

MEDICAL MICROBIOLOGY & INFECTIOUS DISEASES SOCIETY OF PAKISTAN

Medical Microbiology & Infectious Diseases Society of Pakistan issues Statement on Clinical Management Guidelines for Pakistan

KARACHI, May 08,2021: Corona virus disease (COVID-19) is an infectious disease caused by a newly discovered corona virus. Most people infected with the COVID-19 virus will experience mild to moderate respiratory illness and recover without requiring special treatment.

About 5-10% of the patients will require clinical care at a health facility. Due to the novelty of the virus the clinical management evolved over a period of time and a lot has been learned and now standard of care.

Members of the COVID-19 Treatment Guidelines Panel from across the country that is comprised of leading Infectious Diseases experts have developed national guidelines that is regularly updated and the electronic version can be accessed at <https://covid.gov.pk/guideline>

These are based on the best available evidence and as part of national response to this pandemic it is recommended to all the health care facilities to adhere to and adopt these and avoid any other guidelines that could be seriously misleading and dangerous for the patients
