

Water, Sanitation, Hygiene & Immunization

Water supply

- Protect water sources.
- Keep water clean, accessible and affordable.
- Drinking water should always be filtered and boiled (or disinfected) before consumption.

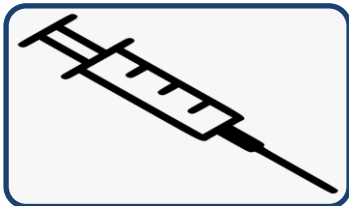

Sanitation

- Ensure adequate, accessible and affordable sanitation facilities.

Hygiene

- Keep yourself and the environment clean and hygienic
- Ensure availability of hand hygiene products (soap, toiletries, etc.)

Immunization

- Childhood immunization according to the EPI to prevent communicable diseases.
- Adult immunization according to risk factors and age.
