He has been Chief Editor of Infectious Diseases Journal Pakistan, and is among the editorial board of renowned national and international journals. Have more than hundred and ninety publications.

Holds multiple national and international portfolios. He holds the office of Executive Director, National Institute of Health, Islamabad. He is a great champion of AMR and NIH has undergone massive restructuring under his leadership to help Pakistan become progress.

Professor Ejaz Khan
President, MMIDSP 2011-2014

Dr. Ejaz did his graduation from Aga Khan University, Hospital, Karachi and pursued his training in Pediatric residency at Gainesville, University of Florida and fellowship in Pediatric Infectious Diseases from Baylor College of Medicine, Houston Texas. He returned to Pakistan

and joined Shifa International Hospital, Islamabad and since then has maintained affiliation with it. Dr. Ejaz is a champion of Antibiotic Stewardship and Immunization.

He is the founding member of MMIDSP and a very active member throughout. We also appreciate his awesome humor.

Dr. Altaf Ahmed
President, MMIDSP 2007- 2010

Dr. Altaf Ahmad is a Clinical Microbiologist, who is rightfully the pioneer of Hospital Infection Control in Pakistan. He is an expert in developing and implementing low cost Infection Control program that are highly effective. It was through his initiative that a Nursing Diploma in

Infection Control was developed to create awareness and skills. He started his career from Liaquat National Hospital, Karachi and then moved to Indus Hospital, Karachi. He currently is the Chief of Infection Control and Clinical Microbiology at the Pakistan Kidney and Liver Institute, Lahore. His amazing humor and poetry in Punjabi language bring life to the forum. His presentations are never to be missed.

Professor Naseem Salahuddin
President, MMIDSP 2003- 2007

Dr. Naseem Salahuddin graduated from Fatima Jinnah Medical College, Lahore. She completed her training in Infectious Diseases from Michigan State, US. She is one of the first Infectious Diseases Physician of Pakistan. Her passion to serve humanity and bring improvement in health care delivery systems is lauded. She has been the pioneer of Tuberculosis and Rabies control

programs in the country. Her humility, kindness and passion to serve makes her the most respected member of our fraternity. She is currently the Chief of Infectious Diseases at The Indus Hospital, Karachi and continues to wage war against Rabies.

Aftab-Manager Rabies Control Program

Muhammad Aftab Goher is a WHO certified expert for Rabies Surveillance & Control, he works for The Indus Hospital as the **Team Lead Rabies Program** since 2011.

Aftab has successfully trained nurses and doctors and we have thus helped to open centers in Karachi and several cities in Sindh and Punjab, he also organizes and leads a month wide Rabies awareness campaign every year in September and presents Indus Hospital Rabies Program on TV, radio, print media, national and international conferences/meetings.

He also associates with The Indus Hospital Research Center working on different clinical trials and projects designed for intervention and elimination of Rabies.

INFECTIOUS DISEASES

*Of all my consultants, most easy to please
Is the fellow who comes from infectious disease.
His wants are so simple! His Needs are so few!
Just gather some sputum, blood cultures times two,
X-ray the patient from guggle to zatch
Examine the urine, both cath and clean catch;
It takes but a moment to do an L.P.,
Swab, wound, throat and cervix, yank out the I.V*

*When all the data at last are collected,
The last culture plated, the last slide inspected
The attending arrives to review and recap
(while intern and student enjoy a brief nap);
He broods with the air of scribe of the papyrus
And gives his opinion, "Most likely a Virus.
Don't bother to fix it: can't treat it , can't cure it ,
Though super infection may later obscure it,
Should there be recurrence of fever or pain,
Go back to square one, and start over again!"*

JULIA BESS, FRANK. M.D
